

Charge to Reviewers:

The National Institute for Occupational Safety and Health (NIOSH) is planning to publish an *Alert* titled "Preventing Worker Injuries and Deaths from Mobile Crane Tip-Over, Boom Collapse, and Uncontrolled Hoisted Loads." This document should prove useful to employers, managers, supervisors, crane operators, riggers and ground workers in companies that use mobile cranes. It is expected that safety and health officials, construction companies, unions, crane and rigging manufacturers, crane rental facilities, building material suppliers and manufacturers, will benefit from the information reported by this document.

Since you have programmatic interest or expertise in this subject, we are requesting your assistance to review and comment on this final draft.
